

Case Study: Medical Billing

Client: Obstetrics and Gynecology

Problem: In-house billing

Situation: Client has always done billing in-house. Client is growing in volume but collections stay stagnant. Historically, Client has high staff turn-over. The Manager has no billing experience and aged accounts are piling up. The office is understaffed and Physician and Manager are unable to dedicate the time necessary for training new employees to oversee billing and collections as the practice grows.

Solution: myeMED's Billing and Collection Services

Outcome: Client experienced an average of 34% increase in collections consistently. This made client realized how much loss they have incurred over the years while doing billing in-house. The client enjoys a 29% increase after the Billing and Collection Service Fee. The Manager is able to focus on managing the staff while the Physician is able to focus on patient care. There is open communication between billing company and the clinic on denials and office deficiencies that are causing billing and collection issues. Client is very satisfied and refers clients to myeMED.

Summary: myeMED's Billing and Collection Services increased aggregate collections by 29%.
