

I have used Mye Med initially for credentialing. I have never seen a company worked so hard to coordinate with me, hospitals, insurance and other companies involved to get me contracted. They understand the difficulties and will fight for me. I had zero problems with my credentialing and got me contracted as expected. I continue to retain them for doing my annual recredentialing and revalidation with insurance. They accommodate changes that I have to make even if it means extra work for them. They are very easy to talk to and explain in detail when I don't understand. I realize they are trustworthy and I am confident they can do my Billing after seeing the success of my insurance contracts. I use them to do my Billing and Collections and I am very happy. I didn't know I could make this much compared to what I used to be making. They communicate the issues with me and keep me in the loop with what's going on. Aside from having a manager for my account who continually works on my collections, their consultant brings up important business matters that could significantly affect my bottom line and guides me with my decisions. This is a company I would give an A+. I will absolutely recommend them!

A handwritten signature in black ink, appearing to read 'Waqar Ahmad', with a large, stylized flourish at the end.

Waqar Ahmad, MD
